Reaching America's true potential to deliver and receive exceptional health care will require not only an immense and concerted effort, but a fundamental change of perspective from medical providers, government officials, industry leaders, and patients alike. The Institute of Medicine set forth six primary aims to which every participant in the American healthcare system must contribute: health care must be safe, timely, effective, efficient, equitable, and patient-centered. Presented as the acronym STEEEP, the collective realization of these goals is to reduce the burden of illness, injury, and disability in our nation. Baylor Health Care System is committed to doing its part and has adopted these six aims as its own. *Achieving STEEEP Health Care* tells the story of Baylor Health Care System's continuing quality journey, offering practical strategies and lessons in the areas of people, culture, and processes that have contributed to dramatic improvements in patient and operational outcomes. This book also discusses newer approaches to accountable care that strive to simultaneously improve the patient experience of care, improve population health, and reduce per capita costs of health care. Provides the perspectives of senior leaders in the areas of corporate governance, finance, and physician and nurse leadership Supplies strategies for developing and supporting a culture of quality, including systems and tools for data collection, performance measurement and reporting Includes service-line examples of successful quality improvement initiatives from reducing heart failure readmissions to coordinating cancer care Outlines approaches to accountable care and improved population health and well-being

Video of the procedure or portion of the procedure, as applicable, accompanies the techniques along with a surgical case. The goal of this issue is to provide a concise reference for surgeons' planning surgeries to review and perhaps adapt currently used methods with this latest information on local anesthetics. Surgical Technique is provided in detail with full analysis of Patient Selection and Planning, Complications and Post-procedure Care. Contents include Complications; Basic Science of Locals; Skin Grafts and Flaps; Peripheral Nerve; Foot Surgery; Breast Surgery; Liposuction; Hand Trauma; Oculoplastic Surgery; Ear Surgery; Hair Transplantation; among others.

be well health center at plano: *Nutrition and Mental Health* Ruth Leyse-Wallace, 2013-01-29 Although primary advanced vitamin and mineral deficiencies are rare in the developed world, many common health conditions deplete nutritional status, including sub-optimal dietary intake, frequent alcohol consumption, changes in appetite due to aging, food allergies or sensitivities, special diets, and eating disorders. Covering topics as diverse as aging, the brain, eating habits, genetics, lifestyle, nutrients, and psychology, this book brings together two extremely complex aspects of life—human nutrition and mental health. Organized by mental health concern as well as nutrient group, *Nutrition and Mental Health* reviews the scientific literature from many fields of science: health, psychology, nutrition, mental well-being, and the interface with chronic disease. It provides a straightforward,

readable report of broadly selected scientific research on how various nutrients affect mental health. Professional resources are provided in easy-to-access tables as well as suggested formats for assessing nutritional status and guidelines for interpretation. Chapter summaries, a descriptive table of contents, an index, and glossary assist the reader in finding specific topics of interest. A variety of mental health conditions may affect a person's ability and interest in getting and eating a well-rounded selection of foods. An examination of the role diet plays in mental health, this book reviews the scientific literature from many fields of science: health, psychology, nutrition, mental well-being, and chronic disease management.

Exemplary, evidence-based nursing practice is the cornerstone of quality care, and this issue highlights many ways in which nurses have led changes to optimize patient outcomes. In addition, quality care enhances cost-effectiveness by reducing avoidable complications and diminishing avoidable hospital readmissions, a concept more important than ever due to value-based purchasing and the Affordable Care Act. Articles are specifically devoted to prevention of delirium in critical care patients, palliative care in the intensive care unit, prevention of pressure ulcers, fall prevention in high-risk patients, prevention readmissions, preventing sepsis mortality, and nursing interventions in the elderly critical care patient, to name a few.

be well health center at plano: Shared Space and the New Nonprofit Workplace China Brotsky, Sarah M. Eisinger, Diane Vinokur-Kaplan, 2019-05-31 While the economy has boomed since the Great Recession, so too have real estate rents and gentrification in cities across North America; nonprofits priced out of formerly affordable neighborhoods lack adequate workplaces to meet their missions. *Shared Space and the New Nonprofit Workplace* presents a comprehensive overview of shared space as an innovative model and effective long-term solution for nonprofit organizations' need for stable and affordable office and program space. In particular, it focuses on co-locating multiple nonprofits in shared spaces, often called nonprofit centers, with shared services and a collaborative culture. This comprehensive resource provides a practical road map to develop new workspaces; documents benefits for nonprofit staff, organizations, and their communities; presents challenges and solutions from successful nonprofit shared spaces; and considers nonprofit centers' history and future trends. Further, it offers nonprofits an opportunity to engage in forward-thinking practices, such as collaborative service delivery, green building operations, and cross-sector alliances. The book will be useful to nonprofit executives, staff and board members, foundations, philanthropists, real estate and urban planning professionals interested in creating these projects, and researchers and students of the nonprofit sector.
