be my teacher 2011: Prison Pedagogies Joe Lockard, Sherry Rankins-Robertson, 2018-07-20 In a time of increasing mass incarceration, US prisons and jails are becoming a major source of literary production. Prisoners write for themselves, fellow prisoners, family members, and teachers. However, too few write for college credit. In the dearth of well-organized higher education in US prisons, noncredit programs established by colleges and universities have served as a leading means of informal learning in these settings. Thousands of teachers have entered prisons, many teaching writing or relying on writing practices when teaching other subjects. Yet these teachers have few pedagogical resources. This groundbreaking collection of essays provides such a resource and establishes a framework upon which to develop prison writing programs. Prison Pedagogies does not champion any one prescriptive approach to writing education but instead recognizes a wide range of possibilities. Essay subjects include working-class consciousness and prison education; community and literature writing at different security levels in prisons; organized writing classes in jails and juvenile halls; cultural resistance through writing education; prison newspapers and writing archives as pedagogical resources; dialogical approaches to teaching prison writing classes; and more. The contributors within this volume share a belief that writing represents a form of intellectual and expressive self-development in prison, one whose pursuit has transformative potential.

be my teacher 2011: *Everyday School Violence* Sarah E. Daly, 2018-10-16 The book aims to discuss the issue of small-scale school violence. While school shootings and safety are of the utmost concern among teachers, students, parents, and the public, many children suffer the effects of everyday violence that affect the learning environment and the sense of safety in schools. Such violence can include bullying, threats, fistfights, theft, weapon-carrying, and more. It offers an overview of aggression and violence, including its theoretical causes and presentations, especially in the context of development and schools. It also outlines the effects of violence on schools and students. The publication is particularly unique in that it will encourage the reader to “slow down the violence” and evaluate it frame-by-frame. This technique, used by the author in consultation, has been effective in preparing school employees to address issues of violence, encouraging them to evaluate their own willingness to intervene, and identifying their own strengths and limitations. By insisting that they have a plan of action, the hope is that they will be better prepared when faced with student conflict, even in the absence of a school plan. Finally, the book discusses basic program design and implementation practices to assist school administrators and professionals to create a tailored program to specifically address their own schools’ needs.

be my teacher 2011: *Effective and Equitable Teacher Practice in Mathematics and Science Education* Nani Teig, Trude Nilsen, Kajsa Yang Hansen, 2024-03-19 This open access book presents original research on effective and equitable teacher practice in mathematics and science education across Nordic countries. It focuses on three key aspects of teacher practice: what teachers teach, how teachers teach, and how teachers assess their students. To provide a comprehensive understanding of teacher practice, data from the IEA’s Trends in Mathematics and Science Study (TIMSS) from 2011 to 2019 was analyzed. TIMSS provides large-scale and representative data, allowing an in-depth investigation of the relations between teachers, their practices, and student outcomes. The findings highlight the changes in teacher practice over time and the extent to which such changes explain the differences in student outcomes. This research also contributes to understanding how the relationships between teacher practice and student outcomes vary across different student groups (i.e., gender, socioeconomic status, and language background). The empirical evidence presented not only adds a significant layer to the academic discourse but also offers practical implications. These insights are crucial in facilitating educational policymaking and classroom practices aimed at improving student outcomes and closing gaps in educational inequality.

be my teacher 2011: System vs. Culture: North American Education and Society in the Balance Frank Pace, 2014-05 For 160 years, North American children have been subject to compulsory schooling. Formal education has evolved some over that time, but the end result of said evolution is an educational system which is dysfunctional, inefficient, and ultimately incapable of delivering on its professed mandates. Frank Pace is an educator with years of diverse experience. He examines the history of modern education and dissects the root causes of its profound dysfunction. *System vs. Culture: North American Education and Society in the Balance* offers some insight into how an alternative model of education might operate and how it would better serve the needs of a changing society and better achieve its purported goals. Frank Pace has many important things to say about the state of North American education. His arguments are persuasive and lucid and backed up by solid scholarship. While the topic is complicated he does a good job breaking it down in a way that is readable and compelling for both education professionals and anyone interested in education and learning.

be my teacher 2011: The Race Controversy in American Education Lillian Dowdell Drakeford Ph.D., 2015-07-28 In this unique two-volume work, expert scholars and practitioners examine race and racism in public education, tackling controversial educational issues such as the

school-to-prison pipeline, charter schools, school funding, affirmative action, and racialized curricula. This work is built on the premise that recent efforts to advance color-blind, race-neutral educational policies and reforms have not only proven ineffective in achieving racial equity and equality of educational opportunities and outcomes in America's public schools but also exacerbated existing inequalities. That point is made through a collection of essays that examine the consequences of racial inequality on the school experience and success of students of color and other historically marginalized populations. Addressing K-12 education and higher education in historically black as well as predominantly white institutions, the work probes the impact of race and racism on education policies and reforms to determine the role schools, school processes, and school structures play in the perpetuation of racial inequality in American education. Each volume validates the impact of race on teaching and learning and exposes the ways in which racism manifests itself in U.S. schools. In addition, practical recommendations are presented that may be used to confront and eradicate racism in education. By exposing what happens when issues of race and racism are marginalized or ignored, this collection will prepare readers to resist—and perhaps finally overcome—the racial inequality that plagues America's schools.
