i have a dream speech impact: Martin Luther King, Jr., and the Theology of Resistance Rufus Burrow, Jr., 2014-11-19 It has been nearly fifty years since Martin Luther King, Jr., was assassinated at the Lorraine Motel in Memphis, Tennessee. Appraisals of King's contributions began almost immediately and continue to this day. The author explores a great many of King's chief ideas and socio-ethical practices: his concept of a moral universe, his doctrine of human dignity, his belief that not all suffering is redemptive, his brand of personalism, his contribution to the development of social ethics, the inclusion of young people in the movement, sexism as a contradiction to his personalism, the problem of black-on-black violence, and others. The book reveals both the strengths and the limitations in King's theological socio-ethical project, and shows him to have relentlessly applied personalist ideas to organized nonviolent resistance campaigns in order to change the world. i have a dream speech impact: I'm not a numbers person Selena Fisk, 2022-04-26 Life in the 21st century dictates that you need to know your numbers and use them to improve your decision-making and enhance your impact. From organizing the home budget, tracking health, understanding social media metrics, to running multi-national, multi-million-dollar organizations, it is no longer acceptable to claim 'but I'm not a numbers person' and believe that it is someone else's job. Data is everywhere. Smart watches track our steps, heart rate, and blood-oxygen levels, social media platforms recommend people we might know and products we might like, and map applications on our phones suggest when we should leave home, taking into consideration where our next appointment is and what the traffic is like. Dr. Selena Fisk believes that the data-informed can use the numbers in conjunction with an understanding of contexts, people, and different situations, to lead change and make shifts in what they do. This book steps through the 'why' of data and the types of data we often see and use through three key areas: data literacy, data visualization, and data storytelling.

i have a dream speech impact: *Using Figurative Language* Herbert L. Colston, 2015-11-19 Using Figurative Language presents results from a multidisciplinary decades-long study of figurative language that addresses the question, 'Why don't people just say what they mean?' This research empirically investigates goals speakers or writers have when speaking (writing) figuratively, and concomitantly, meaning effects wrought by figurative language usage. These 'pragmatic effects' arise from many kinds of figurative language including metaphors (e.g. 'This computer is a dinosaur'), verbal irony (e.g. 'Nice place you got here'), idioms (e.g. 'Bite the bullet'), proverbs (e.g. 'Don't put all your eggs in one basket') and others. Reviewed studies explore mechanisms - linguistic, psychological, social and others - underlying pragmatic effects, some traced to basic processes embedded in human sensory, perceptual, embodied, cognitive, social and schematic functioning. The book should interest readers, researchers and scholars in fields beyond psychology, linguistics and philosophy that share interests in figurative language - including language studies, communication, literary criticism, neuroscience, semiotics, rhetoric and anthropology.

i have a dream speech impact: *Anatomy of Political Choice* ARTUR VICTORIA, 2025-06-08 The Anatomy of Political Choice investigates the fascinating and often frustrating world of political decision-making, exploring the mechanisms through which laws, policies and the allocation of resources are determined. We examine the various actors involved in the process - from elected officials and bureaucrats to lobbyists and the general public - and analyse how their interactions shape the final outcomes. We address the dynamics of negotiation, compromise and conflict resolution, recognising both the successes and failures of different approaches. This analysis goes beyond the mechanics of decision-making, exploring the underlying power dynamics, ideological differences and public opinion that influence decisions. The analysis also considers the ethical implications of political choices, emphasising the importance of accountability, transparency and fairness. By understanding the anatomy of political choice, we can strive for a more informed, fair and effective system of governance. We will explore how these decisions are made, the factors that influence them and the ultimate consequences for society. In essence, politics is a dynamic tension between conflict and co-operation. While conflict results from divergent ideologies, competing interests and power struggles, co-operation is essential for achieving collective goals, adopting effective policies and maintaining social order. We analyse this inherent duality and provide a comprehensive framework for understanding how these seemingly opposing forces shape political outcomes. We explore the sources of conflict, the mechanisms of co-operation and the impact of institutional design and social factors on both. The book is designed to be both academically rigorous and accessible, appealing to students, researchers, policy-makers and informed citizens. We hope that this analysis will enable readers to engage more critically with the complex political landscape and contribute to more effective policy processes.

Interesting, readable and practical - everything I want from this type of book. A brand new take on influencing. Thought provoking and extremely helpful. This book was a revelation. Completely changed the way I see influencing - I now believe that I can grow and develop my ability to influence by concentrating on these seven traits. Very readable book which has changed my perspective on influencing. I always thought of it as a set of tools and techniques but the idea of becoming more influential is much more interesting. This book makes that idea feel possible. I liked the whole concept of developing the traits of influential people and really liked the way they were presented. I enjoyed the exercises and have started to influence people in different ways as a result. Thank you for the ideas. It has made me realize that perhaps I have put too much effort into influencing external clients and stakeholders and not enough time trying to be influential with my own staff!! I quickly realised that, influencing is a much broader topic than I had imagined. I gained from it an understanding that I stand a better chance of maximizing my effectiveness if I play to my own strengths, rather than trying to meet other's expectations of me. Most importantly, I learnt that some of the influencing I see employed by others is really manipulations and not only is it not necessary but it can in fact be counterproductive to subscribe to this method. It was very reassuring to hear that I don't have to become someone I'm not in order to extend my influence!
