

survey questions about artificial intelligence

survey questions about artificial intelligence are essential tools for understanding public perception, industry readiness, and the ethical considerations surrounding AI technologies. These questions help gather valuable insights from diverse audiences, including consumers, professionals, and policymakers. Crafting effective survey questions about artificial intelligence requires a balance between technical specificity and accessibility to ensure respondents can provide meaningful feedback. This article explores a variety of survey questions about artificial intelligence, focusing on different domains such as awareness, trust, ethical concerns, and practical applications. Additionally, it discusses best practices in designing surveys that accurately capture opinions and knowledge about AI. The following sections will provide a detailed overview of key thematic areas to consider when developing AI-related surveys, along with example questions to guide research efforts.

- Understanding Awareness and Knowledge of Artificial Intelligence
- Assessing Trust and Perception in AI Technologies
- Exploring Ethical and Privacy Concerns in AI
- Evaluating AI Adoption and Practical Applications
- Best Practices for Designing AI Survey Questions

Understanding Awareness and Knowledge of Artificial Intelligence

Measuring awareness and knowledge is a foundational step in any survey about artificial intelligence. It establishes a baseline for respondents' familiarity with AI concepts, enabling researchers to tailor subsequent questions more effectively. Survey questions about artificial intelligence in this area often focus on definitions, applications, and general understanding of AI capabilities.

General Awareness Questions

These questions aim to determine whether respondents have heard about artificial intelligence and their basic understanding of what it entails. They help identify knowledge gaps and inform educational strategies.

- Have you heard of artificial intelligence (AI)?
- How would you rate your understanding of AI on a scale from 1 to 5?
- Which of the following best describes artificial intelligence?

- Can you name any industries where AI is currently being used?

Technical Knowledge Assessment

For audiences with more exposure to AI, technical knowledge questions evaluate familiarity with AI subfields, algorithms, and technologies like machine learning, natural language processing, or computer vision.

- Are you familiar with the term "machine learning"? If yes, please explain briefly.
- Which AI technologies have you worked with or used personally?
- Do you understand how AI systems make decisions?
- How confident are you in explaining AI concepts to others?

Assessing Trust and Perception in AI Technologies

Trust is a critical factor influencing the acceptance and adoption of artificial intelligence. Survey questions about artificial intelligence often explore how much confidence people place in AI systems and their perceptions of AI's reliability and impact.

Trust in AI Systems

These questions gauge the level of trust respondents have in AI technologies across various contexts, such as healthcare, finance, or customer service.

- How much do you trust AI to make decisions without human intervention?
- Would you feel comfortable receiving medical advice from an AI system?
- Do you believe AI can be biased or unfair?
- In which areas would you prefer human judgment over AI?

Perceptions of AI Impact

Understanding perceptions of AI's societal effects, including benefits and risks, is essential for policymakers and developers. Questions in this category assess optimism, fear, and expectations about AI's future role.

- Do you think AI will create more jobs or eliminate them?
- What positive effects do you expect from increased AI use?
- Are you concerned about AI causing harm or misuse?
- How likely is AI to improve your daily life in the next five years?

Exploring Ethical and Privacy Concerns in AI

Ethical considerations and privacy issues are central to discussions about artificial intelligence. Survey questions about artificial intelligence in this realm help reveal public attitudes toward data protection, bias, accountability, and transparency.

Data Privacy and Security

These questions examine respondents' concerns about how AI systems collect, store, and use personal data, which is critical in building trust and ensuring compliance with regulations.

- How concerned are you about your personal data being used by AI systems?
- Do you feel AI companies are transparent about data usage?
- Should AI systems require explicit consent before accessing your data?
- What measures would make you more comfortable sharing data with AI?

Bias and Fairness

Bias in AI algorithms can lead to unfair outcomes, making it vital to assess public awareness and concerns regarding this issue.

- Are you aware that AI systems can exhibit bias?
- How important is it to ensure AI decisions are fair and unbiased?
- Should AI decisions be subject to human review to prevent discrimination?
- What steps should be taken to reduce bias in AI?

Evaluating AI Adoption and Practical Applications

Survey questions about artificial intelligence also focus on evaluating how AI is currently adopted across different sectors and the willingness of individuals and organizations to integrate AI solutions.

AI Use in Business and Industry

This subtopic covers how businesses implement AI technologies and the challenges they face during adoption.

- Does your organization currently use AI technologies?
- What types of AI applications are most valuable to your business?
- What barriers have you encountered in adopting AI?
- How do you measure the success of AI initiatives?

Consumer Interaction with AI

Understanding how consumers interact with AI-enabled products and services helps companies improve user experience and satisfaction.

- Have you used AI-powered virtual assistants or chatbots?
- How satisfied are you with AI-driven recommendations (e.g., shopping, streaming)?
- Would you prefer interacting with AI or a human representative for customer service?
- What improvements would you like to see in AI consumer applications?

Best Practices for Designing AI Survey Questions

Effective survey design is crucial for obtaining accurate and actionable data about artificial intelligence. This section outlines best practices to consider when creating survey questions about artificial intelligence.

Clarity and Simplicity

Questions should be clear, concise, and free of jargon to ensure respondents from various backgrounds can understand and answer accurately.

- Use simple language and avoid technical terms unless the target audience is specialized.
- Define key concepts upfront if necessary.
- Use specific questions rather than vague or broad ones.

Balanced and Unbiased Questions

Maintaining neutrality in question wording prevents leading respondents toward a particular answer, preserving the integrity of the data.

- Avoid emotionally charged language or assumptions.
- Present balanced options in multiple-choice questions.
- Include “neutral” or “don’t know” options where appropriate.

Use of Various Question Types

Incorporating different question formats can enhance data richness and respondent engagement.

- Closed-ended questions for quantitative analysis.
- Open-ended questions for qualitative insights.
- Likert scales to measure attitudes and perceptions.
- Multiple-choice questions for categorical data.

Pretesting and Validation

Testing survey questions before deployment helps identify potential issues and improves reliability.

- Conduct pilot surveys with a small sample.
- Revise questions based on feedback and data quality.
- Ensure questions align with research objectives.

Frequently Asked Questions

What are common types of survey questions used to assess opinions about artificial intelligence?

Common types include Likert scale questions to gauge agreement or comfort levels, multiple-choice questions to identify knowledge or experience, and open-ended questions to collect detailed opinions or concerns about AI.

How can survey questions be designed to measure trust in artificial intelligence?

Survey questions can measure trust by asking respondents to rate their confidence in AI systems performing specific tasks, concerns about AI decision-making, and willingness to rely on AI in various contexts such as healthcare or finance.

What are effective survey questions to understand public awareness of artificial intelligence?

Effective questions include asking respondents to define AI in their own words, identify examples of AI they have encountered, and assess their understanding of AI capabilities and limitations.

How do demographic factors influence responses to survey questions about artificial intelligence?

Demographic factors like age, education level, and profession often influence familiarity, acceptance, and trust in AI, making it important to include demographic questions to analyze trends across different population groups.

What ethical concerns related to artificial intelligence can be explored through survey questions?

Survey questions can explore concerns about privacy, bias and fairness, job displacement, accountability, and transparency in AI systems to understand public perceptions and priorities regarding AI ethics.

How can survey questions address the impact of artificial intelligence on employment?

Questions can ask respondents about their perceptions of AI's impact on job security, opportunities for new types of jobs, willingness to retrain, and opinions on policies to manage workforce transitions due to AI.

What role do open-ended survey questions play in researching attitudes toward artificial intelligence?

Open-ended questions allow respondents to express nuanced views, share personal experiences, and highlight concerns or hopes about AI that might not be captured through structured questions, providing richer qualitative insights.

Additional Resources

1. *Surveying the AI Landscape: Understanding Public Perceptions*

This book explores how people around the world perceive artificial intelligence through carefully designed survey questions. It delves into the methodologies used to craft effective AI-related surveys, analyzes responses, and discusses the implications for policymakers and technologists. Readers will gain insight into the societal impact of AI and how public opinion shapes its development.

2. *Designing Effective Survey Questions for AI Research*

Focused on the art and science of questionnaire design, this book provides practical guidelines for creating clear and unbiased survey questions about artificial intelligence. It covers common pitfalls, question types, and validation techniques to ensure reliable data collection. The book is ideal for researchers, marketers, and students interested in AI-related social science research.

3. *Public Attitudes Toward Artificial Intelligence: A Survey Approach*

This volume presents a comprehensive analysis of global survey data on AI acceptance, fears, and expectations. It examines demographic differences, cultural influences, and trends over time, offering a nuanced understanding of how AI is viewed worldwide. The book also discusses how survey findings can inform ethical AI development and deployment.

4. *Measuring Trust in Artificial Intelligence: Survey Strategies and Findings*

Trust is a critical factor in AI adoption, and this book investigates how to measure it through surveys effectively. It introduces scales and question frameworks designed to capture trust levels in AI systems across various applications. The author also reviews case studies where survey results helped improve AI transparency and user confidence.

5. *Ethical Considerations in AI Surveys: Crafting Questions with Care*

Addressing the ethical challenges of surveying AI opinions, this book guides researchers on how to respect privacy, avoid bias, and ensure informed consent. It discusses sensitive topics such as surveillance, data security, and algorithmic fairness through the lens of survey question design. Readers will learn best practices for conducting ethical AI-related surveys.

6. *AI and the Future of Work: Insights from Employee Surveys*

This book compiles survey findings on how AI is transforming workplaces and employee attitudes towards automation. It covers questions related to job security, skill development, and human-AI collaboration. The analysis helps organizations understand workforce concerns and plan for effective AI integration.

7. *Consumer Perspectives on AI Products: Survey Techniques and Analysis*

Focusing on the consumer market, this book presents strategies for surveying customer experiences and expectations with AI-powered products. It includes question templates for assessing satisfaction, usability, and trust. The author offers tips on interpreting survey data to guide product improvement.

and marketing strategies.

8. *AI in Healthcare: Patient Survey Methods and Outcomes*

This specialized book explores how to design and implement surveys that capture patient opinions on AI-driven healthcare technologies. It addresses challenges such as health literacy and confidentiality while highlighting key findings on patient acceptance and concerns. Healthcare professionals and researchers will find valuable tools for engaging patients in AI discussions.

9. *Cross-Cultural Surveying of AI Attitudes: Challenges and Best Practices*

Understanding AI perceptions across cultures requires sensitive survey design, and this book provides a roadmap for researchers tackling this complex task. It covers translation issues, cultural biases, and question framing to ensure valid and comparable data. The book features case studies from multinational AI attitude surveys and offers recommendations for global research initiatives.

survey questions about artificial intelligence: *Artificial Intelligence in Education* Maria Mercedes Rodrigo, Noburu Matsuda, Alexandra I. Cristea, Vania Dimitrova, 2022-07-26 This two-volume set LNAI 13355 and 13356 constitutes the refereed proceedings of the 23rd International Conference on Artificial Intelligence in Education, AIED 2022, held in Durham, UK, in July 2022. The 40 full papers and 40 short papers presented together with 2 keynotes, 6 industry papers, 12 DC papers, 6 Workshop papers, 10 Practitioner papers, 97 Posters and Late-Breaking Results were carefully reviewed and selected from 243 submissions. The conference presents topics such as intelligent systems and the cognitive sciences for the improvement and advancement of education, the science and engineering of intelligent interactive learning systems. The theme for the AIED 2022 conference was „AI in Education: Bridging the gap between academia, business, and non-pro t in preparing future-proof generations towards ubiquitous AI.

survey questions about artificial intelligence: *Artificial Intelligence Applications and Innovations* Ilias Maglogiannis, Lazaros Iliadis, Andreas Andreou, Antonios Papaleonidas, 2025-06-23 This four-volume set constitutes the proceedings of the 21st IFIP WG 12.5 International Conference on Artificial Intelligence Applications and Innovations, AIAI 2025, which was held in Limassol, Cyprus, during June 2025. The 123 full papers and 7 short papers were presented in this volume were carefully reviewed and selected from 303 submissions. They focus on ethical-moral AI aspects related to its Environmental impact, Privacy, Transparency, Bias, Discrimination and Fairness.

survey questions about artificial intelligence: A Practical Guide to Survey Questionnaire Design and Evaluation Emilia Peytcheva, Ting Yan, 2025-04-01 A Practical Guide to Survey Questionnaire Design and Evaluation summarizes principles, guidelines, and best practices for developing and testing survey questionnaires driven and supported by theoretical and empirical research. It provides a broad overview of literature on questionnaire design, drawing on both theoretical and empirical research. This book consists of three parts. The first covers the survey response process model, which will serve as the theoretical framework to establish the basic

principles of writing different types of survey questions (attitudinal, behavioral, demographic, and knowledge). The second part of this book focuses on special topics such as sensitive questions, developing questionnaires for older adults and children, designing a paper survey, designing a web survey and optimizing for a mobile device, developing questionnaires for a multimode survey, and conducting surveys in multiple languages and cultures. The third part of this book describes methods for testing and evaluating survey questions. Topics cover focus groups, cognitive interviewing, expert review, Questionnaire Appraisal System, behavior coding, respondent and interviewer debriefing, randomized experiments, and pilot studies. Given extensive web survey coverage, we also discuss usability testing of web surveys. Finally, we present a brief overview of the use of artificial intelligence and machine learning for questionnaire development and evaluation. Suggestions for further reading, case studies, and discussion questions are included in all chapters. This book will be of interest to those using survey methodology/questionnaires and graduate courses incorporating survey design across the social and behavioral sciences, including psychology, communication studies, nursing and healthcare research, sociology, anthropology, and education.

survey questions about artificial intelligence: Public Perceptions of Artificial Intelligence for Homeland Security Benjamin Boudreaux, Douglas Yeung, Rachel Steratore, Thomas Goode, Nidhi Kalra, Sydne J. Newberry, Michael W. Robbins, Henriquez Sanchez, Keller Scholl, Victoria M. Smith, Kristin Warren, 2024-03-20 To evaluate public perception of the benefits and risks of U.S. Department of Homeland Security use of artificial intelligence technologies, researchers surveyed the nationally representative RAND American Life Panel about the department's uses of these technologies, with a focus on four types of technologies: facial recognition technology, license plate-reader technology, risk-assessment technology, and mobile phone location data.

survey questions about artificial intelligence: Artificial Intelligence in Medicine Joseph Finkelstein, Robert Moskovitch, Enea Parimbelli, 2024-07-25 This two-volume set LNAI 14844-14845 constitutes the refereed proceedings of the 22nd International Conference on Artificial Intelligence in Medicine, AIME 2024, held in Salt Lake City, UT, USA, during July 9-12, 2024. The 54 full papers and 22 short papers presented in the book were carefully reviewed and selected from 335 submissions. The papers are grouped in the following topical sections: Part I: Predictive modelling and disease risk prediction; natural language processing; bioinformatics and omics; and wearable devices, sensors, and robotics. Part II: Medical imaging analysis; data integration and multimodal analysis; and explainable AI.

survey questions about artificial intelligence: Artificial Intelligence (AI) in Social Research Prokopis A. Christou, 2025-04-08 The field of social research is characterized by its broad scope and interdisciplinary nature, encompassing the examination of human behaviour, societies, and various facets of social existence; however, it is influenced by numerous factors, including technological advancements. It is therefore no surprise that Artificial Intelligence (AI) has rapidly become a driving force, bringing about substantial transformations within the field. The use of AI-assisted tools and programmes for the collection, analysis, and interpretation of both quantitative and qualitative data is increasing at a remarkable pace. The implications of utilizing these applications are significant and noteworthy. While these technologies present numerous opportunities, it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement. With a focus on AI's research implications, this book explores various considerations and examples across different disciplines of social research.

survey questions about artificial intelligence: Artificial Intelligence in Education Alexandra I. Cristea, Erin Walker, Yu Lu, Olga C. Santos, Seiji Isotani, 2025-07-17 This six-volume set LNAI 15877-15882 constitutes the refereed proceedings of the 26th International Conference on Artificial Intelligence in Education, AIED 2025, held in Palermo, Italy, during July 22-26, 2025. The 130 full papers and 129 short papers presented in this book were carefully reviewed and selected from 711 submissions. The conference program comprises seven thematic tracks: Track 1: AIED Architectures and Tools Track 2: Machine Learning and Generative AI: Emphasising datadriven Track 3: Learning,

Teaching, and Pedagogy Track 4: Human-Centred Design and Design-Based Research Track 5: Teaching AI Track 6: Ethics, Equity, and AIED in Society Track 7: Theoretical Aspects of AIED and AI-Based Modelling for Education

survey questions about artificial intelligence: Machine Learning and Principles and Practice of Knowledge Discovery in Databases Irena Koprinska, Paolo Mignone, Riccardo Guidotti, Szymon Jaroszewicz, Holger Fröning, Francesco Gullo, Pedro M. Ferreira, Damian Roqueiro, Gaia Ceddia, Slawomir Nowaczyk, João Gama, Rita Ribeiro, Ricard Gavaldà, Elio Masciari, Zbigniew Ras, Ettore Ritacco, Francesca Naretto, Andreas Theissler, Przemyslaw Biecek, Wouter Verbeke, Gregor Schiele, Franz Pernkopf, Michaela Blott, Ilaria Bordino, Ivan Luciano Danesi, Giovanni Ponti, Lorenzo Severini, Annalisa Appice, Giuseppina Andresini, Ibéria Medeiros, Guilherme Graça, Lee Cooper, Naghmeh Ghazaleh, Jonas Richiardi, Diego Saldana, Konstantinos Sechidis, Arif Canakoglu, Sara Pido, Pietro Pinoli, Albert Bifet, Sepideh Pashami, 2023-01-30 This volume constitutes the papers of several workshops which were held in conjunction with the International Workshops of ECML PKDD 2022 on Machine Learning and Principles and Practice of Knowledge Discovery in Databases, ECML PKDD 2022, held in Grenoble, France, during September 19-23, 2022. The 73 revised full papers and 6 short papers presented in this book were carefully reviewed and selected from 143 submissions. ECML PKDD 2022 presents the following workshops: Workshop on Data Science for Social Good (SoGood 2022) Workshop on New Frontiers in Mining Complex Patterns (NFMCP 2022) Workshop on Explainable Knowledge Discovery in Data Mining (XKDD 2022) Workshop on Uplift Modeling (UMOD 2022) Workshop on IoT, Edge and Mobile for Embedded Machine Learning (ITEM 2022) Workshop on Mining Data for Financial Application (MIDAS 2022) Workshop on Machine Learning for Cybersecurity (MLCS 2022) Workshop on Machine Learning for Buildings Energy Management (MLBEM 2022) Workshop on Machine Learning for Pharma and Healthcare Applications (PharML 2022) Workshop on Data Analysis in Life Science (DALIS 2022) Workshop on IoT Streams for Predictive Maintenance (IoT-PdM 2022)

survey questions about artificial intelligence: Artificial Intelligence in HCI Helmut Degen, Stavroula Ntoa, 2025-05-31 The four-volume set LNAI 15819-15822 constitutes the thoroughly refereed proceedings of the 6th International Conference on Artificial Intelligence in HCI, AI-HCI 2025, held as part of the 27th International Conference, HCI International 2025, which took place in Gothenburg, Sweden, June 22-17, 2025. The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions. The papers have been organized in topical sections as follows: Part I: Trust and Explainability in Human-AI Interaction; User Perceptions, Acceptance, and Engagement with AI; UX and Socio-Technical Considerations in AI Part II: Bias Mitigation and Ethics in AI Systems; Human-AI Collaboration and Teaming; Chatbots and AI-Driven Conversational Agents; AI in Language Processing and Communication. Part III: Generative AI in HCI; Human-LLM Interactions and UX Considerations; Everyday AI: Enhancing Culture, Well-Being, and Urban Living. Part IV: AI-Driven Creativity: Applications and Challenges; AI in Industry, Automation, and Robotics; Human-Centered AI and Machine Learning Technologies.

survey questions about artificial intelligence: Artificial Intelligence, Social Computing and Wearable Technologies Waldemar Karwowski and Tareq Ahram, 2023-12-04 Proceedings of the AHFE International Conference on Human Factors in Design, Engineering, and Computing (AHFE 2023 Hawaii Edition), Honolulu, Hawaii, USA 4-6, December 2023

survey questions about artificial intelligence: Artificial Intelligence In Research Methodology Prof. Phool Kumar, Dr. Jyoti, Prof. Anju Bala, 2025 Artificial Intelligence in Research Methodology is an advanced academic resource that explores how Artificial Intelligence (AI) technologies are transforming traditional research practices across various disciplines. This book is designed for students, scholars, educators, and professionals who are engaged in academic or applied research and want to integrate AI tools and techniques into their research process. The book offers a detailed examination of how AI can support and enhance each phase of the research cycle—from problem identification and literature review to data collection, analysis, interpretation,

and presentation. It includes discussions on machine learning, natural language processing (NLP), data mining, automated data analysis, predictive modeling, and the use of AI-powered research tools like ChatGPT, IBM Watson, and others. With real-world examples, case studies, and ethical considerations, the book also addresses the limitations, challenges, and future scope of AI in academic and scientific research.

survey questions about artificial intelligence: Artificial Intelligence and Machine Learning Rohit Tanwar, Surbhi Bhatia, Varun Sapra, Neelu Jyoti Ahuja, 2023-12-07 This book focuses on artificial intelligence (AI) and machine learning (ML) technologies and how they are progressively being incorporated into a wide range of products, including consumer gadgets, smart personal assistants, cutting-edge medical diagnostic systems, and quantum computing systems. This concise reference book offers a broad overview of the most important trends and discusses how these trends and technologies are being created and employed in the applications in which they are being used. *Artificial Intelligence and Machine Learning: An Intelligent Perspective of Emerging Technologies* offers a broad package involving the incubation of AI and ML with various emerging technologies such as Internet of Things (IoT), healthcare, smart cities, robotics, and more. The book discusses various data collection and data transformation techniques and also maps the legal and ethical issues of data-driven e-healthcare systems while covering possible ways to resolve them. The book explores different techniques on how AI can be used to create better virtual reality experiences and deals with the techniques and possible ways to merge the power of AI and IoT to create smart home appliances. With contributions from experts in the field, this reference book is useful to healthcare professionals, researchers, and students of industrial engineering, systems engineering, biomedical, computer science, electronics, and communications engineering.

survey questions about artificial intelligence: *Artificial Intelligence Research* AURORA Gerber, 2020-12-21 This book constitutes the refereed proceedings of the First Southern African Conference on Artificial Intelligence Research, SACAIR 2020, held in Muldersdrift, South Africa, in February 2021. Due to the COVID-19 pandemic the SACAIR 2020 has been postponed to February 2021. The 19 papers presented were thoroughly reviewed and selected from 53 submissions. They are organized on the topical sections on AI for ethics and society; AI in information systems, AI for development and social good; applications of AI; knowledge representation and reasoning; machine learning theory.

survey questions about artificial intelligence: *Artificial Intelligence and Machine Learning for EDGE Computing* Rajiv Pandey, Sunil Kumar Khatri, Neeraj Kumar Singh, Parul Verma, 2022-04-26 *Artificial Intelligence and Machine Learning for Predictive and Analytical Rendering in Edge Computing* focuses on the role of AI and machine learning as it impacts and works alongside Edge Computing. Sections cover the growing number of devices and applications in diversified domains of industry, including gaming, speech recognition, medical diagnostics, robotics and computer vision and how they are being driven by Big Data, Artificial Intelligence, Machine Learning and distributed computing, may it be Cloud Computing or the evolving Fog and Edge Computing paradigms. Challenges covered include remote storage and computing, bandwidth overload due to transportation of data from End nodes to Cloud leading in latency issues, security issues in transporting sensitive medical and financial information across larger gaps in points of data generation and computing, as well as design features of Edge nodes to store and run AI/ML algorithms for effective rendering. - Provides a reference handbook on the evolution of distributed systems, including Cloud, Fog and Edge Computing - Integrates the various Artificial Intelligence and Machine Learning techniques for effective predictions at Edge rather than Cloud or remote Data Centers - Provides insight into the features and constraints in Edge Computing and storage, including hardware constraints and the technological/architectural developments that shall overcome those constraints

survey questions about artificial intelligence: *Artificial Intelligence for Drug Development, Precision Medicine, and Healthcare* Mark Chang, 2020-05-07 *Artificial Intelligence for Drug Development, Precision Medicine, and Healthcare* covers exciting

developments at the intersection of computer science and statistics. While much of machine-learning is statistics-based, achievements in deep learning for image and language processing rely on computer science's use of big data. Aimed at those with a statistical background who want to use their strengths in pursuing AI research, the book:

- Covers broad AI topics in drug development, precision medicine, and healthcare.
- Elaborates on supervised, unsupervised, reinforcement, and evolutionary learning methods.
- Introduces the similarity principle and related AI methods for both big and small data problems.
- Offers a balance of statistical and algorithm-based approaches to AI.
- Provides examples and real-world applications with hands-on R code.
- Suggests the path forward for AI in medicine and artificial general intelligence.

As well as covering the history of AI and the innovative ideas, methodologies and software implementation of the field, the book offers a comprehensive review of AI applications in medical sciences. In addition, readers will benefit from hands on exercises, with included R code.

survey questions about artificial intelligence: Artificial Intelligence in Forecasting Sachi Mohanty, Preethi Nanjundan, Tejaswini Kar, 2024-07-19 Forecasting deals with the uncertainty of the future. To be effective, forecasting models should be timely available, accurate, reliable, and compatible with existing database. Accurate projection of the future is of vital importance in supply chain management, inventory control, economic condition, technology, growth trend, social change, political change, business, weather forecasting, stock price prediction, earthquake prediction, etc. AI powered tools and techniques of forecasting play a major role in improving the projection accuracy. The software running AI forecasting models use machine learning to improve accuracy. The software can analyse the past data and can make better prediction about the future trends with higher accuracy and confidence that favours for making proper future planning and decision. In other words, accurate forecasting requires more than just the matching of models to historical data. The book covers the latest techniques used by managers in business today, discover the importance of forecasting and learn how it's accomplished. Readers will also be familiarised with the necessary skills to meet the increased demand for thoughtful and realistic forecasts.

survey questions about artificial intelligence: Investigating AI Readiness in the Maltese Public Administration Marvic Sciberras, Alexiei Dingli, 2023-01-27 The book presents a unique study on the Artificial Intelligence (AI) readiness of public administrations focusing on the Maltese public administration as a case study. This was conducted following the launch of the Malta AI National Strategy in 2019. Since the Maltese public administration is the driving force behind the integration of AI solutions nationwide, the research is deemed necessary to understand whether the public workforce itself is ready to face the oncoming AI revolution. The researchers applied a mixed-methods approach to gain insight and a broader perspective of the status quo concerning AI adoption. Important considerations that stem from this study include the need for increased AI knowledge among public administrators since the majority of respondents reported a lack of awareness of AI technologies and their deployment. Understanding AI-related advantages must be accompanied by a robust instructional effort at all levels of education. It was unanimously agreed that the early inclusion of AI-related courses in the Maltese educational system will aid in developing a future AI-savvy workforce. Furthermore, upskilling and reskilling the public officers will facilitate knowledgeable human capital and proficiencies required to effectively integrate AI solutions within society. The study concludes by recommending several critical reforms within governments that will improve the AI-readiness factor of any Public Administration.

survey questions about artificial intelligence: Artificial Intelligence in Education. Posters and Late Breaking Results, Workshops and Tutorials, Industry and Innovation Tracks, Practitioners, Doctoral Consortium, Blue Sky, and WideAIED Alexandra I. Cristea, Erin Walker, Yu Lu, Olga C. Santos, Seiji Isotani, 2025-07-23 This three-volume set CCIS 2590-2592 constitutes poster papers and late breaking results, workshops and tutorials, practitioners, industry and policy track, doctoral consortium, blue sky and wideAIED papers presented at the 26th International Conference on Artificial Intelligence in Education, AIED 2025, held in Palermo, Italy, during July 22-26, 2025. The 72 full papers and 73 short papers (72 of them presented as posters)

presented in this book were carefully reviewed and selected from 296 submissions. They are organized in topical sections as follows: Part I: BlueSky; Practitioners, Industry and Policy; WideAIED; Doctoral Consortium. Part II: Late Breaking Results; Part III: Late Breaking Results; Workshops and Tutorials.

survey questions about artificial intelligence: *Artificial Intelligence Research* Anban Pillay, Edgar Jembere, Auna Gerber, 2022-11-30 This book constitutes the refereed proceedings of the Third Southern African Conference on Artificial Intelligence Research, SACAIR 2022, held in Stellenbosch, South Africa, in December 2022. The 26 papers presented were thoroughly reviewed and selected from the 73 submissions. They are organized on the topical sections on algorithmic, data driven and symbolic AI; socio-technical and human-centered AI; responsible and ethical AI.

survey questions about artificial intelligence: ARTIFICIAL INTELLIGENCE: A MODERN APPROACH IN DIFFERENT FIELDS Prof. Rashmi Pant , Dr. Vibha Pandey & Dr. Pradeep Pandey, 2024-12-16 While highlighting the advantages of Artificial intelligence (AI) in enhancing human memory, creativity, and decision-making in daily life, the review paper also notes the difficulties and vulnerabilities involved in implementing AI. The encoding, storing, and retrieval of our experiences are powered by human memory. AI has the ability to both facilitate and impede memory encoding and retrieval, as well as aid in our knowledge of the problems facing memory research. An artist's own creative abilities may be compromised if they depend too much on AI-generated features. When AI systems offer ready-to-eat concepts people could become unduly dependent on them rather than making their own independent creative thought processes.
