The extractive industries, alongside the financial, infrastructure and retail sectors are particularly dynamic as the government pursues diversification strategies and the middle class expands.

sura asset management colombia: Saving in Latin America and the Caribbean Francesco Grigoli, Alexander Herman, Klaus Schmidt-Hebbel, 2015-05-18 This paper analyzes saving patterns and determinants in Latin America and the Caribbean (LAC), including key policy variables and regimes. The review of previous empirical studies on LAC saving reveals contradictions and omissions. This paper presents empirical results of an extensive search of determinants of private and public saving rates, adding previously neglected variables (including different measures of key external prices and macroeconomic policy regimes), in linear form and in interactions with other saving determinants. It analyzes statistical differences in saving determinants between LAC and the rest of the world in a nested econometric framework, and discusses differences across three country subgroups within LAC. The results highlight commonalities and differences in saving behavior between LAC and other world regions, as well as within LAC, identifying the role of key policy variables and regimes.

sura asset management colombia: Latin American Local Capital Markets: Challenges and Solutions Mauro Miranda, 2018-06-15 Capital markets, both for debt and equity securities, have allowed firms to secure funding for productive uses while providing investors with opportunities for portfolio diversification. The importance of capital markets for the development of economies and for the betterment of society cannot be overstated. This is just as true in emerging economies with free markets, such as those found in Latin America, as it is in developed markets. However, capital markets in the region are not being utilized to the fullest. The idea behind this collection of articles is to offer a primer on the development of local capital markets in several select countries in Latin America. We discuss not only their history and current status but also their future. To this end, seven authors contributed to this project, each writing about one of seven countries: Argentina, Brazil, Chile, Colombia, Mexico, Peru, and Uruguay. Each author decided which issues they believe matter most to the progress of their local capital markets. Some authors chose a qualitative and institutional description of local markets, whereas others adopted a more quantitative approach.

sura asset management colombia: Intelligent M & A Scott Moeller, Chris Brady, 2014-06-23 Almost 70% of mergers fail, yet deals are essential for growing world-class companies. Therefore they must use all the tools and techniques at their disposal to improve their chances of success. Applying the techniques advocated in this book can help managers beat the odds - and employees themselves - to have an impact on whether a deal will be successful both for the company and for themselves. This book looks at the process of a merger or acquisition and pinpoints the areas where business intelligence can raise the odds of success in each phase of the deal. Using techniques developed by governmental intelligence services and a wide range of recent case studies, quotations and anecdotes, the expert authors from the renowned Cass Business School show how to build success into any M&A situation. The first edition of Intelligent M&A was written in 2006 and published in 2007. This preceded the peak year (2007) of the last merger wave, including the excesses in a number of industries and deals (e.g., financial services with RBS’ dramatically failed acquisition of ABN AMRO as a key example), and the global economic downturn that led to a completely new way of operating for many industries and companies. Therefore, there is a need to update the book to incorporate not just more relevant and up-to-date case studies of deals but to show the ‘new’ way of operating in a post-Lehman environment. Chapters will be comprehensively re-written and populated with new and relevant case studies.

sura asset management colombia: Live Long and Prosper World Bank, 2015-12-10 Aging is a challenge which countries in East Asia and Pacific (EAP) regions are grappling with or will soon confront. It raises many questions for policymakers ranging from potential macroeconomic impacts, to fiscal challenges of supporting pension, health and long-term care systems, and labor market implications as countries seek to promote productive aging. The urgency of the aging challenge varies across the region, but it will confront all EAP countries in time and early preparation is essential to avoid the missteps of other regions. Live Long and Prosper discusses the societal and public policy challenges and reform options for EAP countries as they address aging. It aims to strike a balance between aging optimists and pessimists. On the one hand, the impacts of aging on growth, labor markets and public spending are not the unavoidable catastrophe often feared. However, minimizing the downside risks of aging and ensuring healthy and productive aging will require proactive public policy, political leadership, and new mindsets across society. The report reviews the evidence on demographic transition in EAP and its potential macroeconomic impact. It addresses the current policy environment including pensions and social security, health, and long-term care and labor markets to assess the risks of 'business as usual'. It also suggests policy directions to promote healthy and productive aging in EAP, and emphasizes that aging is not just about older people, but requires policy and behavioral change across the life cycle.

With this need in mind, this book contains contributions from leading private equity practitioners in 29 different countries, with observations and advice on private equity deal-making, investing and fundraising in their respective jurisdictions. Contributors include: Iain McMurdo, Maples and Calder; Christian Hoedl, Uria Menendez.

sura asset management colombia: *The Report: Peru 2017* Oxford Business Group, Over the last decade Peru has consistently been the fastest-growing economy in Latin America, and unlike some of its neighbours, has been remarkably resilient to global headwinds, registering positive growth rates for an uninterrupted 18 years through to 2016. While the pace of growth has slowed as the long commodities boom ebbed after 2012, Peru recorded an average annual growth rate of 5.9% in 2005-15, almost double the 3% rate for Latin America as a whole. Stakeholders and investors will now be looking to efforts by the new government, which took office in July 2016, to address problems, implement additional reforms and spur further economic growth.

Although Latin American societies are still younger than most advanced economies, like other emerging markets the region is already in a process of population aging that is expected to accelerate in the remainder of the century. This will directly affect fiscal sustainabil-ity by putting pressure on public pension and health care systems in the region that are already more burdened than, for example, in emerging Asia, a region with a similar demographic structure. A stylized cross-country exercise, drawing on demographic projections from the United Nations and methodologies developed by the IMF to derive public spending projections, is used to quantify long-term fiscal gaps generated by population aging in 18 Latin American countries.1 Several aspects of current pensions and health care systems in Latin Amer-ica make the region’s long-term fiscal positions particularly vulnerable to population aging.

Gilinski adquirió la compañía de alimentos Nutresa -años atrás, la tradicional Compañía Nacional de Chocolates- es el movimiento empresarial más importante de los últimos tiempos en Colombia y también un momento definitivo en una apasionante y sorprendente historia: la del Grupo Empresarial Antioqueño, GEA, antes conocido como Sindicato Antioqueño, actor protagónico en la vida económica -y política- del país. A través de más de 60 entrevistas y una amplia investigación bibliográfica, la autora logra una reconstrucción minuciosa del proceso que llevó a los pioneros entusiastas de los años 1900 a convertirse en industriales poderosos que conquistaron los mercados de Colombia y varios países del hemisferio, una historia de intensas batallas por el poder empresarial, gestas memorables, actos audaces y luchas incansables para mantener el control de emblemáticas compañías.

sura asset management colombia: Seguridad social Germán Ernesto Ponce Bravo, 2020-05-01 Este libro es el insumo para comprender la estructura del sistema colombiano general de seguridad social, con el fin de que el lector se haga a una idea holística, técnica e integral de los fundamentos conceptuales que forman su creación y que determinan su desarrollo. Uno de los inconvenientes históricos para lograr este cometido se explica por la dificultad de comprender que el sistema general de seguridad social es producto de una necesaria interacción entre el derecho y la economía, relación que, por supuesto, no siempre es armoniosa. En los diferentes capítulos, los autores aportan una visión multidisciplinaria de la seguridad social y, así, a partir de una noción básica de economía de mercado, se depositan, progresivamente, los elementos jurídicos y políticos que permitan al lector comprender, de manera general, cómo funciona el sistema, para que identifique sus retos y se haga una idea propia de la seguridad social y de los caminos que, eventualmente, se vislumbran para su mejora, como respuesta al permanente proceso de transformación social.

sura asset management colombia: *El sujeto emprendedor* Ricardo Cuenca, 2022-10-01 Hoy ser emprendedor es políticamente correcto y ocupa un lugar importante en el imaginario social acerca del éxito y de la calidad de vida. De alguna manera, el emprendedurismo ha dejado de ser una excepción en la estructura social del trabajo, para expandirse como norma. Programas universitarios, talleres cortos, charlas motivacionales y libros inspiradores nos invitan a “sacar” al emprendedor que todos tenemos dentro para asegurar triunfos en la vida. Esta investigación tuvo como objetivo principal identificar al sujeto emprendedor y sus imaginarios de éxito en el contexto actual. Para ello, los autores indagan en las dimensiones subjetivas de un grupo de emprendedores del distrito de Ate, en Lima. De manera general, encontramos que el emprendedurismo sirve para conjugar las necesidades materiales y la falta de oportunidades laborales con una narrativa donde sobreponerse solo a las adversidades constituye un valor en sí mismo.

Luz María Rivas Montoya, Silvia Ivonne Ponce Sagredo, 2015-02-01 Es claro que el desafío que plantea Luz María Rivas es el de una dirección que debe responder a una compañía multinegocio, lo que supone una diferencia sobre el direccionamiento de las empresas que no tienen esta condición. No obstante, es preciso decir que el origen de Suramericana y también del Grupo Sura - holding de inversiones-, es la anteriormente denominada Suramericana de Seguros S. A, hoy identificada como Seguros Generales Suramericana. Hace siete décadas la vocación de esta empresa estaba orientada a un único sector de la industria, incluso después de la creación, tres años más tarde, de la Compañía de seguros de vida, que mantiene el mismo objeto industrial con el que se reconoce mundialmente.

Solo si disponemos de una amplia información y realizamos un profundo análisis podremos responder satisfactoriamente a tan difíciles preguntas. Este libro presenta un examen de las tendencias demográficas, macroeconómicas y sociales que nos permiten entender cuáles son las variables más relevantes para evaluar la idoneidad y sostenibilidad de cualquier sistema previsional. El análisis incluye una evaluación del impacto del régimen privado de pensiones creado a inicios de la década de 1990 como parte de las reformas institucionales de finales del siglo XX. Un estudio minucioso de las características fundamentales del Perú y del régimen privado de pensiones permitirá aproximarnos a esta compleja problemática.
