supreme health monsey ny: Victimology William G. Doerner, Steven P. Lab, 2017-03-16

Victimology, Eighth Edition, shows how to transform the current criminal's justice system into a victim's justice system. Doerner and Lab, both well-regarded scholars, write compellingly about the true scope of crime victims' suffering in the United States. They lay out the sources of evidence available to victimology researchers. In later chapters, theory is woven together with the description of each topic and illustrated with specific examples. The second part of the book addresses the full impact of victimization. Part III, Types of Victimization, details specific problems ranging from violent crimes, child and elder abuse, and property crime to crime in the workplace. The authors emphasize their concern with the extent of criminal victimization, explain how obstacles hinder the pursuit of justice, and introduce the idea that reforms have rendered the system much more victim-friendly. Appropriate for undergraduate as well as early graduate students in Victimology courses in Criminology, Criminal Justice, and Sociology programs, as well as Justice Studies, this book offers an instructor's manual with a test bank, as well as PowerPoint lecture slides and a companion site with student resources.

supreme health monsey ny: Corrections Mary K. Stohr, Anthony Walsh, 2019-12-10 Written by two academic scholars and former practitioners, *Corrections: From Research, to Policy, to Practice*, Second Edition offers students a 21st-century look into the treatment and rehabilitative themes that drive modern-day corrections. Authors Mary K. Stohr and Anthony Walsh expertly weave together research, policy, and practice to give readers a foundational understanding of the field of corrections. Readers will gain a comprehensive and practical understanding of corrections, as well as exposure to often-overlooked topics, including correctional programming and treatment, special problem-solving courts, and comparative corrections.

supreme health monsey ny: High and Low Corruption Harry Adams, 2023-12-19 *High and Low Corruption: Children, Capabilities, and Crime* provides a systematic theory of corruption, and analyzes “high corruption” in terms of political corruption and high-end white-collar crime, and “low corruption” in terms of juvenile delinquency and street crime. It shows how delinquents and street criminals often suffer from arrested development of their basic human capabilities. In turn, Harry Adams argues that their maldevelopment often emerges neither merely through their own fault when they were children nor through the fault of biological caregivers who were guilty of parental child neglect. Beyond this, Adams argues that the maldevelopment of at-risk youth commonly emerges through a kind of political child neglect, when corrupt public officials fail to provide adequate protection or back-up support for their development. In these ways, the author shows how the former type of high corruption (or “suite crime”) can significantly contribute to the latter type of corruption (and street crime). By applying a set of moral, constitutional, and criminological principles from Derek Parfit, Ronald Dworkin, and Jeffrey Reiman, respectively, Adams also provides a systematic account of why and how both these types of corruption should be curbed.
