teacher appreciation week 2024 notes: *Be the Adult* F. Lance Hoopes, 2024-04-16 I will never forget the moment I first learned to "Be the Adult." It was in my first job as an administrator after many years of teaching. I bested a kid in a passionate argument and sent him back to class while my boss and mentor looked on. I glowed with pride until he quietly deflated me with the five words that changed the rest of my career: "Remember, Lance: You're the adult." That phrase floods my mind with stories, the stories in this book. Some are heroic, some are embarrassing, but all of them can help you learn what I learned. I had to be the adult in a band room facing hostile kids, and facing students who played a passage so beautifully it brought tears to my eyes. I had to be the adult on 110-degree Tucson, Arizona, football fields, in band buses far from home — and facing concerned superintendents and furious teachers as an administrator. Schools can and do change students for the better, but only on one condition: Someone has to Be the Adult.

teacher appreciation week 2024 notes: *Technology and Learning* Rosemary Sage, Riccarda Matteucci, 2024-06-03 This book unpicks how the growing role of technology, particularly tools designed to solve real-world problems, impacts thinking and expression. Mind-bending AI-generated fact, fiction, art and music challenge the boundaries of machine capability and human consciousness. Quantum physics views consciousness as self-observation reliant on language and thinking. Now machines implement life routines, there is a need for better human thinkers and communicators for tackling issues, like climate change and overpopulation. World Thinking Studies show decline in language and thinking, with one-third of adults lacking them for life needs. Technology reduces direct talk – essential for thought. A 2024 Mental State of the Year study finds Britain the world's second most miserable place, only slightly more cheerful than Uzbekistan, showing inability to think through and solve problems. The subjects discussed in this book are processes, for applying technology successfully; practices, to determine how to implement technology support for thinking, communication, and collaboration; performance, in terms of student technology experiences; and predictions, to outline and analyse current technology trends.

As a global authority in child psychology, I underscore the essential role that children's etiquettes and manners play in facilitating mutual understanding between children and their parents. First and foremost, children's etiquettes and manners are necessary tools for effective communication. Politeness, respect, and consideration are the bases of civilized discourse. By teaching children how to express themselves politely and respectfully, parents pave the way for harmonious interactions within the family unit. A well-mannered child is also more likely to develop positive noble relationships. The social skills acquired through learning and practicing good etiquette enable children to navigate the complex ground of noble interactions with grace and ease. A child who understands the importance of respecting others' boundaries and feelings is more likely to form lasting, meaningful connections with peers, which, in turn, can lead to increased parental insight into their child's social world. Children's etiquettes and manners also play an essential role in their academic success. In educational settings, politeness and respect are essential for productive learning environments. A child who respects their teachers, classmates, and school rules is more likely to excel academically. Moreover, children with good manners tend to be more cooperative, attentive, and open to learning, enabling parents to better comprehend their child's educational needs and aspirations. Effective communication between parents and teachers is paramount in ensuring a child's academic progress, and the presence of good manners facilitates this communication. As children progress through different stages of development, they encounter various challenges and opportunities for personal growth. It is essential for parents to be attuned to their child's evolving needs and emotions. Etiquette and manners serve as a compass, guiding children through these transitions while allowing parents to remain actively engaged and supportive. When children practice empathy, gratitude, and consideration, parents gain deeper insights into their child's values, beliefs, and character, fostering a profound bond of understanding and trust. children's etiquettes and manners are not superficial facts but essential components of their holistic development. These virtues prepare children with the tools necessary to navigate the complexities of social interactions, foster positive relationships, excel academically, and confront the challenges of personal growth. As parents, it is our responsibility to instill and reinforce these qualities in our children, not only for their benefit but also to enhance our mutual understanding and strengthen the parent-child bond. teacher appreciation week 2024 notes: What Can I Take Off Your Plate? Jill Handley, Lara Donnelly, 2024-08-28 Teacher burnout demands systemic solutions, not self-care. Learn what leaders can do to actively reduce frustration and provide real, sustaining support for all staff. With teachers across the board assuming additional responsibilities, stress and job dissatisfaction are more prevalent than ever. Widespread staff shortages, which further increase workloads, and budget directives that require everyone to do more with less continue to demotivate and erode morale. It's no wonder so many teachers choose to leave the profession—or that many who remain feel overworked and unappreciated. The proper response from principals and other school leaders is not to encourage so-called self-care but rather to take a systemic approach that focuses on the factors they can control: time, effort, and resources. To increase teacher retention and alleviate the compounded effects of teacher burnout, leaders need to ask less of their staff and offer them more. In What Can I Take Off Your Plate?, veteran educators Jill Handley and Lara Donnelly detail both the immediate steps you can take to triage your staff's emotional exhaustion and the big-picture structural changes you can make to reduce frustration, increase motivation, and support the whole teacher. You'll learn useful ways to * Reduce initiative fatigue. * Give the gift of time. * Support from within the classroom. * Foster and support a healthy work-life balance. * Demonstrate appreciation. * Infuse fun in the workplace. This book is for school leaders who are ready to treat burnout like the complicated challenge it is—and meet it with both focused action and the lasting, sustainable solutions it demands.

teacher appreciation week 2024 notes: *Leading under Duress* Jean-Pierre Bongila, 2024-11-15 This comparative study of teacher attrition in the Global South and OECD countries examines the exceptionality of twenty selected learning leaders in the D.R. Congo, Ghana, and Uganda who have stayed in the teaching profession and led their student learning with devotion and integrity. Like any learning leader, exceptional teachers live the challenges and pressures that have caused some of their peers to leave the profession. The extraordinary learning leaders - from elementary, secondary, and higher education - have stood victorious amid education devaluations and professional tensions. The author gives voice to those “exceptional” teachers and analyzes the ethical rationale behind their unfailing commitment to their teaching vocation. Their teaching philosophies and personal accounts revealed altruistic impulses. This book further explores the exceptional teachers’ narratives and their selfless actions through the lens of philanthropic and leadership ethics theories. Although the exceptional teachers’ altruism appears self-sacrificing - it embodies some form of self-benefit because one can hardly fathom altruism for altruism’s sake. Nevertheless, the twenty exceptional teachers acted in a self-sacrificing manner. The author appeals to the Global South countries to implement education policies that should redecorate the profession of learning leadership.

Wang, 2024 Discover how the crisis of a global pandemic allowed educators to improve learning across the pre-K-adult pipeline. While acknowledging the scale of loss and difficulty the COVID pandemic engendered within the field of education, this book focuses on how sudden and forced changes to teaching and learning created “Pandemic Positives,” which can be captured and brought to scale. The text features art created by the coauthors and shares both their professional and personal experiences, humanizing and enriching the book. *Mending Education* completes a trilogy composed of *Breakaway Learners* and *Trauma Doesn’t Stop at the School Door* by Karen Gross. “We have all bemoaned the COVID pandemic and its lasting negative effects, but Karen Gross and Edward Wang turn that pessimism on its head. Focusing on 13 dispositions specific to teaching, this book encourages educators to identify, reflect, and develop their dispositions, attitudes, and self-awareness to flourish in the profession. Emphasizing pedagogical knowledge and skills, this text serves as an affirmation of a teacher's commitment to challenging, complex and rewarding work. It invites educators to consider what a unique privilege it is to teach—to dive into reading, creating space, and embracing dispositions as a teacher's greatest strength. Each chapter focuses on one of 13 teaching dispositions—such as curiosity, adaptability, gratitude, resilience, and courage—and offers: definitions and contexts for the disposition of focus; concrete applications for teachers to practice and develop dispositions with reader-friendly examples and practical strategies; a “pause and reflect” section with questions and space for professional reflection. This book serves as a love letter to educators everywhere: teachers in K-12, administrators in K-12, higher education faculty, and pre-service programs and students. *Dispositions Are a Teacher's Greatest Strength* reminds teachers of the significant work they do by putting dispositions at the forefront of their daily work.

teacher appreciation week 2024 notes: *Till the Bitter End* RM Suhuncheck, 2024-03-01 The first ten years of my career in education was as an elementary school teacher. Nevertheless, the focus of my book is on my twenty-three years as an assistant principal. Utilizing true stories and conversations, I attempt to illustrate how poor leadership transformed a once proud school district into Pittsville. There is no possible way that I would have ever attempted to write my story, had not my career taken so many twists and turns. Working for twelve principals, in spans that ranged from two months to seven and a half years, enabled me to develop my own set of strategies, learn what ideas worked, and accumulate enough stories that made me angry, made me laugh, and motivated me to write my story. In closing, bitterness is not a character trait becoming to anyone, yet bitterness is what motivated me to write my story.

teacher appreciation week 2024 notes: *Oxford Studies in Agency and Responsibility Volume 8* Santiago Amaya, David Shoemaker, Manuel Vargas, 2024-01-31 *Oxford Studies in Agency and Responsibility* is a series of volumes presenting outstanding new work on a set of connected themes, investigating such questions as: · What does it mean to be an agent? · What is the nature of moral responsibility? Of criminal responsibility? What is the relation between moral and criminal responsibility (if any)? · What is the relation between responsibility and the metaphysical issues of determinism and free will? · What do various psychological disorders tell us about agency and responsibility? · How do moral agents develop? How does this developmental story bear on questions about the nature of moral judgment and responsibility? · What do the results from neuroscience

imply (if anything) for our questions about agency and responsibility? OSAR thus straddles the areas of moral philosophy and philosophy of action, but also draws from a diverse range of cross-disciplinary sources, including moral psychology, psychology proper (including experimental and developmental), philosophy of psychology, philosophy of law, legal theory, metaphysics, neuroscience, neuroethics, political philosophy, and more. It is unified by its focus on who we are as deliberators and (inter)actors, embodied practical agents negotiating (sometimes unsuccessfully) a world of moral and legal norms. Volume 8 focuses on non-ideal agency and responsibility.
