teacher appreciation day images: Proactive Images for Pre-Service Teachers Jeremy Delamarter, 2019-03-23 This book provides tools to help pre-service teachers and teacher-preparation programs identify, evaluate, and respond to misaligned expectations early in the teacher-preparation sequence. Plato tells the story of prisoners who mistake the shadows on the wall

of their cave for flesh-and-blood reality. These “shadow narratives” dominated their expectations, and when confronted with a three-dimensional reality that bore little resemblance to the shadows, the prisoners were blinded by the light. Surrounded by images and rhetoric that reduce the fullness of teaching to flat, two-dimensional representations, today's pre-service teachers tend to develop expectations of teaching that resemble the shadows more than they resemble reality. These misaligned expectations often lead to practice shock: the painful and disillusioning cognitive dissonance that comes about when unsustainable expectations collide with real-world practice. Intended as a proactive manual for mitigating practice shock, this book shines a light on the shadows by giving pre-service teachers the tools to examine, confront, and revise their own misaligned expectations of teaching before they reach the point of crisis.

teacher appreciation day images: Music, Education, and Religion Alexis Anja Kallio, Philip Alperson, Heidi Westerlund, 2019-09-20 Essays examining the role of religion in music education from a variety of perspectives. Music, Education, and Religion: Intersections and Entanglements explores the critical role that religion can play in formal and informal music education. As in broader educational studies, research in music education has tended to sidestep the religious dimensions of teaching and learning, often reflecting common assumptions of secularity in contemporary schooling in many parts of the world. This book considers the ways in which the forces of religion and belief construct and complicate the values and practices of music education—including teacher education, curriculum texts, and teaching repertoires. The contributors to this volume embrace a range of perspectives from a variety of disciplines, examining religious, agnostic, skeptical, and atheistic points of view. Music, Education, and Religion is a valuable resource for all music teachers and scholars in related fields, interrogating the sociocultural and epistemological underpinnings of music repertoires and global educational practices. “The book serves as a study volume for all those who are active in this field and provides both systematic reflections and useful empirical studies. A further impressive feature is the regional and religious breadth of the content presented and examined.” —Wolfgang W. Müller, *Reading Religion*

teacher appreciation day images: Teacher Quality, Professional Learning and Policy Christine Forde, Margery McMahon, 2019-04-01 This book examines the significance of teacher expertise in the drive to improve quality and effectiveness. Scrutinising both key conceptual issues and current policy developments and approaches, the authors analyse educational systems from around the

world and question how different cultural contexts and systems can implement measures to improve teacher effectiveness. The book analyses factors such as policy change and teacher evaluation as well as the regulation of the teaching profession to determine how these aspects can influence the expertise of individual teachers. As numerous policy interventions have tried to define and enhance teacher quality to raise pupil achievement, this book calls for an interrogation of this stance and signals a need to consider an alternative approach. This book will appeal to students and scholars of teacher effectiveness and professional learning, as well as researchers and policymakers.
